Ayesha Rehan

STUDENT| MICROSOFT DYNAMICS DEVELOPER

PROFESSIONAL SUMMARY

I am a passionate Computer Science student with hands-on experience in full-stack web development, AI-based applications, and Power Platform solutions. Skilled in building responsive, secure, and user-friendly systems using modern technologies.

Rawalpindi, Pakistan

EDUCATION

Bachelor of Computer Science | 2023-2027
Fatima Jinnah Women University

- Relevant Coursework: Programming Fundamentals, OOP, Database Systems, Artificial Intelligence, Data Structures, Computer Organization and Assembly Language, Computer Networks, Web Engineering, Mobile App Development
- CGPA: 3.67

WORK EXPERIENCE

Microsoft Dynamics Developer | 7/2025-Present
Optimal Logics Private Limited

- Completed a 2-month internship; promoted to full-time role based on performance.
- Developed and customized solutions using Microsoft Power Platform and C#.
- Contributed to automation and data-driven application projects.

PROJECTS

Healthcare Appointment and Management System
Advance Database Course, Fourth Semester of Bachelors Degree

- Developed a full-stack Healthcare Appointment Management System using PHP, MySQL, HTML,CSS & JS.
- Implemented secure database handling with prepared statements, input validation, and error management.
- Enabled appointment booking, medical record management, payments, and feedback in a user-friendly web interface.

Contact Management System
Data Structures and Algorithms Course, Third Semester of Bachelors Degree

- Built a C++ Contact Management System using Windows API for adding, viewing, searching, deleting, and sorting contacts.
- Implemented persistent data storage with text file handling to retain contacts across multiple sessions.
- Demonstrated efficient data structure usage for fast search and sort operations.

Blood Bank Management System

Object-Oriented Programming and Database Systems Course, Second Semester of Bachelors Degree

- Developed a Blood Bank Management System showcasing encapsulation, inheritance, and polymorphism principles.
- Designed normalized database schema and implemented SQL queries for efficient data retrieval and management.
- Integrated backend logic with structured data storage for donor and blood inventory management.

Student Management System

Programming Fundamentals Course, First Semester of Bachelors Degree

- Demonstrated progressive technical growth across core computer science domains in a single repository.
- Applied various programming paradigms and database concepts to real-world academic scenarios.

RealTime Redis Chat

Parallel & Distributed Computing Course, Sixth Semester of Bachelors Degree

- Built a scalable real-time chat application using Node.js, Socket.IO, Redis, Docker, and Nginx load balancing.
- Implemented distributed system concepts including concurrency handling and containerized deployment.
- Achieved load balancing across multiple server instances for improved performance and reliability.

Transport Management System

Web Engineering Course, Fifth Semester of Bachelors Degree

- Developed a real-time university transport management system using React Native, Firebase, and Node.js.
- Implemented live vehicle tracking, route management, and separate dashboards for Admins, Drivers, and Students.
- Enabled efficient monitoring and management of university transportation services through role-based access.

TECHNICAL SKILLS

- HTML | CSS | JavaScript | PHP | MySQL | C++ | Python | C | Power Platform (Power Apps, Power Automate, Power Pages) | C# (.NET Framework)
